Q3 2026 Gambling Market & Regulatory Brief · Published 16 Oct 2026 (DICJ Q3-26 game-type statistics; monthly Sept GGR released 1 Oct 2026) · Currency MOP (Macau pataca; tables in MOP billions unless stated) with ~USD alongside at USD/MOP 8.07

CONFIDENTIAL · INTERNAL
Prepared: 20 Oct 2026
B2Tech · via Merlin

THE ONE-LINE VERDICT

Macau's casino GGR fell 3.8% YoY to MOP 60.22bn (~$7.46bn) in Q3-26 — the first quarterly decline since the post-COVID reopening — as mass/premium-mass baccarat dropped 7.9% and the market absorbed the World Cup, softer Chinese high-end demand and tougher hold comps; VIP stabilised (+6.3% QoQ, flat YoY) and slots grew 18.8%. For an operator, Macau remains a closed, six-concession, land-based-only market taxed at an effective 40% of GGR until 31 Dec 2032: the only realistic entry is B2B (EGMs, systems, content), where the slot segment is the one structurally growing line.

Q3-26 GGR (games of fortune)	Mass baccarat GGR	VIP baccarat GGR	Slot machine GGR	9M-26 GGR	9M-26 gaming tax collected
MOP 60.22bn (~$7.46bn)	**MOP 33.61bn (~$4.17bn)**	**MOP 16.91bn (~$2.10bn)**	**MOP 4.09bn (~$0.51bn)**	**MOP 187.1bn (~$23.2bn)**	**MOP 74.56bn (~$9.24bn)**
-3.8% YoY / -1.3% QoQ	-7.9% YoY; 55.8% share	+0.1% YoY / +6.3% QoQ	+18.8% YoY; 6.8% share	+3.2% YoY; ~15% below 9M-19	+5.9% YoY; 84.1% of govt revenue

1 EXECUTIVE SUMMARY

- **First quarterly YoY decline of the recovery cycle.** DICJ data for Q3-26 (Jul–Sep) put GGR from games of fortune at MOP 60.22bn (~$7.46bn), down 3.8% YoY and 1.3% QoQ, against an implied Q3-25 base of MOP 62.6bn (~$7.76bn). IAG rounds the same release to MOP 60.4bn/−3.7%; the AGB/Focus GN/Yogonet figure of MOP 60.22bn is used here.
- **Mass/premium-mass baccarat is the problem line.** Mass baccarat GGR fell 7.9% YoY and 4.4% QoQ to MOP 33.61bn (~$4.17bn); its share of GGR slipped to 55.8% from 58.3% a year earlier. The MOP 2.88bn (~$357m) absolute drop exceeded the total market decline, i.e. everything else net-grew.
- **Total baccarat (the Gaming Intelligence hook) was MOP 50.52bn (~$6.26bn), −5.4% YoY**, the lowest in six quarters; baccarat remains ~84% of casino GGR, underlining Macau's product concentration.
- **VIP has stabilised rather than recovered.** VIP baccarat GGR was MOP 16.91bn (~$2.10bn), +0.1% YoY and +6.3% QoQ after an 18.8% sequential fall in Q2-26; share rose to 28.1%. 9M-26 VIP GGR is MOP 52.38bn (~$6.49bn), +9.9% YoY. Caveat: DICJ's VIP definition is table-designation based and runs far above the concessionaires' own VIP disclosures.
- **Slots are the only structurally growing product.** Slot GGR rose 18.8% YoY to MOP 4.09bn (~$0.51bn), 6.8% of GGR (5.5% a year ago); 9M-26 slot GGR is MOP 12.18bn (~$1.51bn), ~+19% (derived). Live multi-game (LMG) electronic tables fell 8.0% to MOP 1.14bn (~$0.14bn).
- **Monthly cadence shows four consecutive YoY declines.** July MOP 20.26bn (~$2.51bn, −8.4%, World Cup final 19 Jul), August MOP 21.89bn (~$2.71bn, −1.2%), September MOP 18.06bn (~$2.24bn, −1.2%, lowest month of 2026, −17.5% MoM). 9M-26 GGR is MOP 187.1bn (~$23.2bn), +3.2% YoY but ~15% below 9M-19's MOP 220.3bn (~$27.3bn).
- **Channel: 100% land-based.** Macau licenses no online casino or online betting; online penetration of the regulated market is 0%. Non-casino regulated wagering is limited to the Macau Slot sports lottery (football GGR MOP 152m/~$18.8m, +49% on the World Cup; basketball MOP 44m/~$5.5m, +4.8%) and the SLOT Chinese lottery; horse racing ceased in 2024.
- **Licensing is closed until 2032.** Law 16/2001 as amended by Law 7/2022 caps the market at six concessions (SJM Resorts, Galaxy Casino, Venetian Macau/Sands China, Wynn Resorts (Macau), Melco Resorts (Macau), MGM Grand Paradise), each a 10-year contract from 1 Jan 2023 to 31 Dec 2032, extendable by up to three years only exceptionally. Market-wide caps: 6,000 tables and 12,000 machines.
- **Tax base is GGR, effective rate 40%.** Special gaming tax 35% of GGR (art. 27) plus fixed contributions of 2% (public foundation) and 3% (urban development, tourism, social security) — Law 7/2022 removed the former 'up to' wording, lifting the levies from an actual 4% to a fixed 5%. The 5% can be waived on GGR from foreign (non-Greater-China) players under AR 54/2022. Gaming profits are exempt from complementary (profits) tax through 31 Dec 2027.
- **Premiums and minimum-yield rules add a fixed-cost floor.** Each concessionaire pays a fixed premium of MOP 30m (~$3.7m) p.a. plus MOP 300,000 (~$37k) per VIP table, MOP 150,000 (~$18.6k) per mass table and MOP 1,000 (~$124) per machine (minimum charge equivalent to 500 tables/1,000 machines). A 'special premium' of 35% of any shortfall applies if annual GGR per table is below MOP 7m (~$0.87m) or per machine below MOP 300,000 (~$37k).
- **Fiscal take is running ahead of GGR.** The Financial Services Bureau collected MOP 74.56bn (~$9.24bn) of gaming taxes in 9M-26, +5.9% YoY (tax lags GGR by one month), equal to 84.1% of the government's MOP 88.71bn (~$10.99bn) current revenue and 80.6% of the MOP 92.53bn (~$11.47bn) full-year budget (of which MOP 82.60bn/~$10.24bn is the 35% special tax; junket-commission tax budgeted at just MOP 150m/~$18.6m).
- **Government forecast is a floor, not a target.** The 2026 budget assumes GGR of MOP 236bn (~$29.2bn); Chief Executive Sam Hou Fai said on 10 Oct that no downward revision is being considered. With 9M-26 at MOP 187.1bn, Q4 needs only MOP 48.9bn (~$6.06bn), or MOP 16.3bn (~$2.02bn)/month — a bar the market will clear even in a severe Q4.
- **Sell-side is converging on ~+1% for FY26.** J.P. Morgan cut FY26 to MOP 249bn (~$30.9bn, +1% vs FY25's MOP 247.4bn/~$30.7bn, ~85% of 2019); Seaport models Q4 −5%; Bloomberg consensus growth has fallen to ~3% from 7% at the start of the year; one bank's October call is −6% to MOP 22.6bn (~$2.80bn).
- **Demand mix is deteriorating even as volume hits records.** August visitor arrivals were a record 4.5m (+6.1%) but same-day visitors rose 11.7% while overnight visitors fell 2.4%; GGR per visitor fell 7% to MOP 4,888 (~$606) in August and is MOP 5,386 (~$667) for 8M-26, below both 2025 and pre-COVID. Hotel occupancy was 93.9% in August. The

Macau Economic Association expects Q3-26 GDP −2% on the gaming slowdown.

- **China policy is the overhang.** Seaport links premium softness to weaker mainland macro and tax enforcement on offshore trusts/wealth; CreditSights sees capital controls as a sentiment drag on high rollers but not a direct GGR hit because funding channels are already tightly controlled. Four of the six concessionaires flagged premium volume diversion during the World Cup.
- **Junkets are structurally marginal.** Law 16/2022 confines gaming promoters to one concessionaire each, bans revenue-sharing and caps commissions at 1.25% of rolling; the gaming-credit law (effective Aug 2024) reserves credit extension to concessionaires. The budgeted MOP 150m (~$18.6m) junket-commission tax implies commissionable rolling of ~MOP 12bn (~$1.5bn) a year at the cap — a rounding error against VIP GGR of MOP 52bn+. Licensed junket count for 2026 is [unverified in this session].
- **Enforcement is tightening, not loosening.** Gaming-related crime rose 12.3% in 9M-26; Law 7/2024 (effective Oct 2024) criminalised illegal currency exchange for gambling and strengthened sanctions on illegal/online gambling; casino entry is 21+, smoking is confined to non-gaming lounges, and gaming advertising is tightly restricted in Macau and criminalised for mainland audiences under PRC law.
- **Non-gaming obligations are large and binding.** The six concessions carry MOP 118.8bn (~$14.7bn) of pledged investment (Galaxy alone MOP 28.35bn/~$3.5bn, of which only MOP 0.9bn/~$0.11bn gaming), with a +20% uplift once annual GGR exceeds MOP 180bn (~$22.3bn) — a trigger already met in 2024 (FY24 GGR MOP 226.8bn/~$28.1bn); the incremental amount is [unverified in this session].
- **Read-through for B2Tech:** there is no B2C route into Macau before 2033 and no online route at all. The addressable opportunity is B2B — EGM/ETG cabinets, slot content, systems and compliance tech to six well-capitalised concessionaires chasing a slot segment growing ~19% a year in a market where everything else is flat-to-down; the 12,000-machine cap and MOP 300,000 (~$37k) minimum yield per machine shape the floor-space economics. Regional spill-over (Philippines, Vietnam, UAE 2027, Thailand if legalised) is the better B2C lens for the same customer base.

2 MARKET SUMMARY

MACAU – MOP BN (~USD AT 8.07)	Q3-26	YOY	QOQ	9M-26	9M YOY
GGR – GAMES OF FORTUNE (DICJ; GROSS OF TAX; 100% LAND-BASED)					
Total casino GGR 9M on DICJ monthly series; sum of DICJ quarterly game-type tables is MOP 187.46bn (+3.4%). Focus GN reports 9M-26 as MOP 181.3bn/+3.7% — that equals the 9M-25 base and appears mislabelled.	**60.22 (~$7.46bn)**	**-3.8%**	**-1.3%**	**187.1 (~$23.2bn)**	**+3.2%**

3 DEEP-DIVE — MASS MARKET (MASS & PREMIUM-MASS BACCARAT, OTHER TABLES, ELECTRONIC TABLES)

Mass baccarat −7.9% YoY to MOP 33.61bn (~$4.17bn) is the whole story of the quarter: record footfall, falling spend per head.

MASS BACCARAT GGR

Mass baccarat GGR fell 7.9% YoY and 4.4% QoQ to MOP 33.61bn (~$4.17bn), a third straight sequential decline.

- Prior quarters: MOP 36.56bn (~$4.53bn) in Q1-26 and MOP 35.2bn (~$4.36bn) in Q2-26.
- DICJ's 'mass baccarat' bundles grind mass and premium mass; operators and sell-side locate the weakness in premium mass.
- World Cup (11 Jun–19 Jul) diverted play; Chinese high-end demand softened under weaker macro and tighter tax enforcement on offshore wealth.
- The MOP 2.88bn (~$357m) YoY fall in this line exceeded the MOP 2.38bn (~$295m) fall in total GGR.

BROADER MASS SEGMENT

Mass including slots fell 5.2% YoY to MOP 43.31bn (~$5.37bn), 71.9% of GGR.

- Compares with MOP 45.13bn (~$5.59bn) in Q2-26 (+0.8% YoY then) and MOP 46.48bn (~$5.76bn) in Q1-26.
- Residual other mass tables (sic bo, roulette, fan tan, blackjack, poker variants) ~MOP 5.61bn (~$0.70bn), down ~2.6% YoY on our derivation.
- Live multi-game electronic terminals fell 8.0% to MOP 1.14bn (~$0.14bn) from MOP 1.30bn (~$0.16bn) in Q2.
- Notable because LMG had been a growth product and is where ETG suppliers compete.

VOLUME VERSUS YIELD

Volume is not the problem; yield is: record 4.5m August visitors (+6.1% YoY) but GGR per visitor fell 7% to MOP 4,888 (~$606).

- Hotel occupancy was 93.9% in August.
- 8M-26 GGR per visitor MOP 5,386 (~$667), below both 2025 and pre-COVID.
- Macau Economic Association attributes the gap to mix shift: same-day visitors +11.7%, overnight visitors −2.4% in August.
- Concerts at Galaxy Arena and Venetian Arena lifted premium visitation in early August; non-gaming calendar moves premium mass at the margin but does not offset a cyclical downturn in Chinese wealth sentiment.

HOLD AND COMPS

Part of the −7.9% is a base effect from high-hold Q3-25, but the two-quarter sequential decline is a demand signal, not variance.

- Seaport flags the tough hold comparison persisting into October.
- Sequential declines of −3.8% then −4.4%.
- Macau Economic Association estimates Q3-26 GDP −2%, confirming gaming is now a drag on the territory's economy.

COMMERCIAL IMPLICATION

A 5–8% mass decline compresses EBITDA faster than the headline; CLSA and Goldman expect Q3 property EBITDA to fall YoY.

- Mass is where the six concessionaires earn their margin (no junket commissions, lower reinvestment).
- Operators will protect premium-mass floors with product refreshes and ETG/slot capacity (yield per square metre rising) rather than add tables.
- Constraints: 6,000-table cap and MOP 7m (~$0.87m) per-table minimum-yield rule.
- Any mass-table capacity reallocation to electronic formats benefits machine and systems vendors.

MASS MARKET – MOP BN (~USD AT 8.07)	Q3-26	YOY	QOQ	Q2-26	Q1-26
Mass baccarat (mass + premium mass)	**33.61 (~$4.17bn)**	**-7.9%**	**-4.4%**	**35.2 (~$4.36bn)**	**36.56 (~$4.53bn)**
Other mass table games incl. LMG (derived)	5.61 (~$0.70bn)	~-2.6%	~-3.6%	5.82 (~$0.72bn)	5.94 (~$0.74bn)
of which LMG electronic tables	1.14 (~$0.14bn)	-8.0%	-12.3%	1.30 (~$0.16bn)	1.26 (~$0.16bn)
Slot machines (see slots segment)	4.09 (~$0.51bn)	+18.8%	-0.5%	4.11 (~$0.51bn)	3.98 (~$0.49bn)
Total mass incl. slots	**43.31 (~$5.37bn)**	**-5.2%**	**-4.0%**	**45.13 (~$5.59bn)**	**46.48 (~$5.76bn)**

Mass incl. slots share of total GGR	71.9%	-1.1pp	-1.8pp	73.7%	70.4%
Visitor arrivals (Aug-26)	4.5m (record)	+6.1%	n/a	n/a	n/a
GGR per visitor (Aug-26)	MOP 4,888 (~$606)	-7%	n/a	n/a	n/a
Implied Q3-25 base: mass baccarat / mass incl. slots	36.49 (~$4.52bn) / 45.69 (~$5.66bn)	—	—	—	—

4 DEEP-DIVE — VIP BACCARAT & GAMING PROMOTERS (JUNKETS)

VIP GGR MOP 16.91bn (~$2.10bn) stabilised (+6.3% QoQ, flat YoY) under an in-house premium-direct model; junkets are now a residual channel.

VIP BACCARAT GGR

VIP baccarat GGR of MOP 16.91bn (~$2.10bn) stabilised, +0.1% YoY and +6.3% QoQ, under an in-house premium-direct model.

- Recovers part of the 18.8% sequential collapse in Q2-26 (MOP 15.90bn/~$1.97bn), attributed to low hold and the World Cup.
- Still 13.6% below the Q1-26 peak of MOP 19.56bn (~$2.42bn, +35.4% YoY).
- Share of GGR rose to 28.1% (26.1% in Q2; 27.0% in Q3-25).
- 9M-26 VIP GGR MOP 52.38bn (~$6.49bn), +9.9% YoY, decelerating from +15.2% at the half-year.

DEFINITIONAL CAVEAT

DICJ 'VIP' captures a large slice of premium-direct play that operators book as premium mass; comparisons with junket-era VIP are not like-for-like.

- DICJ classifies VIP by table designation inside the integrated resorts.
- Concessionaires' own disclosures report VIP/rolling-chip as low-to-mid teens share of revenue in most cases.
- Pre-2022 junket-era VIP was ~50%+ of GGR.

JUNKET CHANNEL

The junket channel has been legislated into irrelevance; 2026 budget projects junket-commission tax of just MOP 150m (~$18.6m).

- Law 16/2022 restricts each promoter to a single concessionaire, bans revenue-share, caps commissions at 1.25% of rolling-chip turnover, requires annual licence renewal.
- Gaming-credit law (effective Aug 2024) permits only concessionaires to extend gaming credit.
- Tax at the 1.25% cap implies commissionable rolling of only ~MOP 12bn (~$1.5bn) a year [derived; exact tax base not confirmed].
- Number of licensed promoters for 2026 could not be verified in this session.

MACRO AND POLICY OVERHANG

Analyst checks point to VIP being range-bound rather than re-accelerating.

- CreditSights (29 Sep): China capital-control tightening unlikely to hit GGR directly as funding channels already tightly policed, but could dampen high-roller sentiment.
- Seaport (early Oct) cites tax enforcement on offshore trusts and weaker mainland macro as drags on wealthy customers.
- Citi's July weekly checks showed VIP rolling volume up only 0–2% WoW even as the World Cup schedule thinned.

COMMERCIAL IMPLICATION

VIP is now a concessionaire-owned, credit-backed premium-direct business with no third-party operator or agent model for a new entrant.

- Supplier value is indirect: premium rooms drive demand for high-limit ETG and table-management/AML systems.
- Regulatory direction (credit law, illegal-exchange crackdown, PRC cross-border gambling criminalisation) is unambiguously toward fewer intermediaries and more surveillance.

VIP & JUNKETS – MOP BN (~USD AT 8.07)	Q3-26	YOY	QOQ	Q2-26	Q1-26
VIP baccarat GGR	**16.91 (~$2.10bn)**	**+0.1%**	**+6.3%**	**15.90 (~$1.97bn)**	**19.56 (~$2.42bn)**

5 DEEP-DIVE — SLOTS/EGMS, SPORTS LOTTERY AND THE (ABSENT) ONLINE CHANNEL

Slots +18.8% YoY to MOP 4.09bn (~$0.51bn) are the only structural growth line; Macau Slot football GGR +49% on the World Cup; no online channel exists or is planned.

SLOT GGR GROWTH

Slot GGR grew 18.8% YoY to MOP 4.09bn (~$0.51bn), the only structural growth line, lifting share to 6.8% of GGR.

- −0.5% QoQ from MOP 4.11bn (~$0.51bn); share was 5.5% a year earlier.
- Quarterly growth run: +21.6% (Q1), +17.0% (Q2), +18.8% (Q3); 9M-26 slot GGR MOP 12.18bn (~$1.51bn), ~+19% on our derivation.
- Growth from premium-mass players migrating to high-denomination cabinets and smoke-free electronic floors, and operators' active floor re-mixing.
- Not from volume tourism: same-day visitors rising but their spend is low.

CAPACITY ECONOMICS

The 12,000-machine cap, not the yield test, is the binding constraint, supporting replacement-cycle and premium-cabinet demand rather than unit expansion.

- Allocation examples: Venetian 3,700 and Galaxy 1,700 machines per 2022 contract summaries.
- Variable premium MOP 1,000 (~$124) per machine; minimum-yield test MOP 300,000 (~$37k) GGR per machine per year.
- Tables: MOP 150,000–300,000 (~$18.6k–37k) premium and MOP 7m (~$0.87m) minimum yield.
- Installed base yields well above the minimum on average.
- Live multi-game ETGs fell 8.0% to MOP 1.14bn (~$0.14bn), suggesting operators prioritise true slots over stadium-style ETG.

SPORTS LOTTERY

Sports lottery is tiny and monopoly-run: football GGR +49.0% to MOP 152m (~$18.8m), basketball +4.8% to MOP 44m (~$5.5m).

- Macau Slot (SLOT) holds the concession for football and basketball; World Cup final on 19 July fell inside the quarter.
- Together ~0.3% of casino GGR.
- Macau Jockey Club ended horse racing in 2024, so pari-mutuel wagering is effectively nil.
- World Cup moved ~MOP 1–2bn (~$0.12–0.25bn) of casino GGR per month but only ~MOP 50m (~$6m) of lottery GGR.

ONLINE CHANNEL

Online penetration of the regulated market is 0% and there is no legislative initiative to change that.

- Macau licenses no online casino, poker or sports betting.
- Law 7/2024 (effective Oct 2024) sharpened criminal sanctions on illegal gambling including online promotion and illegal currency exchange.
- PRC criminalised organising cross-border gambling for mainland residents in 2021; DICJ maintains a public list of illegal gambling websites.
- Political priority is economic diversification ('1+4'), not channel expansion.

COMMERCIAL IMPLICATION

For B2Tech, the slot line is the only part of the Macau P&L growing double digits; sportsbook or iGaming product has no legal landing.

- Slots served through six buyers with regulator-approved EGM technical standards (DICJ EGM certification).
- Sports-lottery concession is a monopoly and online is closed.
- Relevant Asian online opportunities sit outside the SAR (Philippines PIGO, etc.).

6 DEEP-DIVE — LICENSING & TAX: THE CONCESSION REGIME (LAW 16/2001 AS AMENDED BY LAW 7/2022)

Six 10-year concessions to 31 Dec 2032, 35% special tax + 5% fixed levies = 40% of GGR, premiums and minimum-yield rules — stable, closed and expensive.

CONCESSION STRUCTURE

Six 10-year concessions run 1 Jan 2023 to 31 Dec 2032 under Law 16/2001 as amended by Law 7/2022; stable, closed and expensive.

- Regulator is DICJ under the Secretary for Economy and Finance; Chief Executive (Sam Hou Fai since Dec 2024) holds key discretionary powers.
- Concessionaires: SJM Resorts, Galaxy Casino, Venetian Macau (Sands China), Wynn Resorts (Macau), Melco Resorts (Macau), MGM Grand Paradise.
- Sub-concessions abolished; maximum term 10 years with exceptional extensions of up to three years.
- Minimum share capital MOP 5bn (~$0.62bn); Macau-permanent-resident managing director holding at least 15% of capital.
- Gaming only in concessionaire-owned premises, ending satellite casinos after transition to 31 Dec 2025; exact closure count [unverified in this session].

TAX BASE AND RATE

35% special gaming tax plus fixed 2% and 3% levies equals 40% of GGR from 2023, up from an effective 39%.

- Special tax (art. 27) payable monthly by the 10th of the following month to the Financial Services Bureau.
- Law 7/2022 deleted 'up to' language under which levies had been charged at 1.6% and 2.4%.
- Under AR 54/2022 the 5% may be reduced or waived on GGR from foreign (non-mainland/HK/Taiwan) players, effectively 35%.
- Gaming profits exempt from the 12% complementary tax for 1 Jan 2023–31 Dec 2027; renewal is the next fiscal decision point.
- Junket commissions attract a separate withholding, budgeted at MOP 150m (~$18.6m) for 2026.

PREMIUMS AND MINIMUM YIELD

Fixed premium MOP 30m (~$3.7m) plus per-unit premiums, with a 35% special premium on shortfalls below minimum yields of MOP 7m per table and MOP 300,000 per machine.

- Variable premium: MOP 300,000 (~$37k) per VIP table, MOP 150,000 (~$18.6k) per mass table, MOP 1,000 (~$124) per machine; floor of 500 tables and 1,000 machines.
- Minimum yield MOP 7m (~$0.87m) per table and MOP 300,000 (~$37k) per machine, reviewable by the Chief Executive.
- Market-wide cap 6,000 tables and 12,000 machines, e.g. Venetian 1,680 tables/3,700 machines; Galaxy 1,000/1,700.
- Separate annual 'utilisation fee' for casino space that reverted to the government on 31 Dec 2022.

FISCAL DEPENDENCE

Gaming taxes of MOP 74.56bn (~$9.24bn) in 9M-26, +5.9% YoY, were 84.1% of government current revenue, so rates will not rise.

- Tax lags GGR by a month, reflecting Dec-25–Aug-26 GGR; current revenue MOP 88.71bn (~$10.99bn).
- 2026 budget expects MOP 92.53bn (~$11.47bn) gaming taxes (MOP 82.60bn/~$10.24bn from the 35% special tax) on assumed GGR of MOP 236bn (~$29.2bn).
- 40% on Q3-26 GGR implies ~MOP 24.1bn (~$2.99bn) quarterly levies before premiums [derived].
- 40% is already the highest headline casino tax among major jurisdictions; government leans on concessionaires for non-gaming investment instead.
- MOP 118.8bn (~$14.7bn) pledged across six contracts, with +20% uplift once annual GGR exceeds MOP 180bn (~$22.3bn), triggered in 2024.

DIRECTION OF TRAVEL

No change to rates, caps or concession count before 2032; regime offers contractual certainty but no entry route.

- 2027 Policy Address and budget (Nov 2026) will set a new GGR assumption and may revisit the foreign-player levy waiver.
- Renewal of the profits-tax exemption beyond 2027.
- DICJ scrutiny of non-gaming investment delivery and the post-satellite footprint.
- Possible tightening of minimum-yield thresholds if GGR per table stays below 2019 levels.
- For a supplier: six solvent, tax-paying buyers contractually obliged to keep investing.

LICENSING & TAX – RULE / AMOUNT	RULE / RATE	BASIS / NOTES
Enabling law	Law 16/2001 as amended by Law 7/2022	Regulator: DICJ (Secretary for Economy & Finance)
Concessions	6, awarded Dec 2022	10 years: 1 Jan 2023 – 31 Dec 2032; max +3 yrs exceptional
Concessionaires	SJM, Galaxy, Venetian Macau (Sands China), Wynn Macau, Melco, MGM Grand Paradise	Q3-26 operator GGR shares not published by DICJ [unverified]
Minimum share capital / local MD	MOP 5bn (~$0.62bn) / Macau PR holding ≥15%	Law 7/2022
Special gaming tax	35% of GGR	Art. 27; paid monthly by 10th
Public foundation contribution	2% of GGR (fixed)	Was 'up to 2%' (1.6% charged) pre-2023
Urban development / tourism / social security contribution	3% of GGR (fixed)	Was 'up to 3%' (2.4% charged) pre-2023
Effective levy	40% of GGR	Waiver of the 5% possible on foreign-player GGR (AR 54/2022)
Complementary (profits) tax on gaming profits	Exempt	Dispatch covers 1 Jan 2023 – 31 Dec 2027
Fixed premium	MOP 30m (~$3.7m) p.a. per concession	Payable by 10 Jan or monthly
Variable premium	MOP 300k (~$37k)/VIP table; MOP 150k (~$18.6k)/mass table; MOP 1,000 (~$124)/machine	Floor = 500 tables + 1,000 machines
Special premium (minimum yield)	35% of shortfall below MOP 7m (~$0.87m)/table or MOP 300k (~$37k)/machine p.a.	Thresholds reviewable by Chief Executive
Inventory cap	6,000 tables / 12,000 machines	Allocated per concession (e.g., Venetian 1,680/3,700; Galaxy 1,000/1,700)
Non-gaming investment pledge	MOP 118.8bn (~$14.7bn) across six	+20% if annual GGR > MOP 180bn (~$22.3bn) — triggered 2024; increment [unverified]
Satellite casinos	Transition ended 31 Dec 2025	Gaming only in concessionaire-owned premises; closures count [unverified]
9M-26 gaming tax collected	MOP 74.56bn (~$9.24bn), +5.9%	84.1% of govt current revenue; 80.6% of MOP 92.53bn (~$11.47bn) budget
Budget GGR assumption FY26	MOP 236bn (~$29.2bn)	Maintained 10 Oct 2026; FY25 actual MOP 247.4bn (~$30.7bn)

7 DEEP-DIVE — PAYMENTS, AML, RESPONSIBLE GAMBLING, ADVERTISING & ENFORCEMENT

A cash-and-chip market inside China's capital-control perimeter, with enforcement intensity rising (gaming-related crime +12.3% in 9M-26) and no advertising runway.

PAYMENTS REALITY

Macau is a HKD-chip, cash-settled market inside China's capital-control perimeter with no licensed online wallet layer.

- Mainland visitors face the US$50,000 annual individual quota, UnionPay card controls and Macau's cross-border cash declaration regime.
- Law 7/2024 (effective Oct 2024) criminalised unlicensed currency exchange for gambling, targeting 'money-changer' gangs that funded premium play.
- CreditSights' September note: funding channels already so tightly controlled that incremental Chinese capital-control tightening is unlikely to show up in GGR directly.
- Casino credit only by concessionaires under the gaming-credit law (effective Aug 2024).
- Digital-yuan or card-at-cage innovations not a feature of the regulated floor [status unverified in this session].

AML/KYC

Gaming-related crime rose 12.3% in 9M-26, arguing for continued aggressive enforcement rather than relaxation.

- Concessionaires file large-transaction and suspicious-transaction reports to the Financial Intelligence Office (GIF) under DICJ AML instructions.
- The 2022–2024 legislative package (gaming, junket, credit, illegal-gambling laws) shifted liability onto concessionaires and removed intermediaries.
- Crime data from Macau police reported by IAG, combined with four months of GGR declines.

RESPONSIBLE GAMBLING

Entry and employment restricted to persons aged 21+ (Law 10/2012); DICJ runs self-exclusion and third-party exclusion schemes.

- Smoking permitted only in enclosed smoking lounges with no gaming; full-floor ban since 2019.
- Responsible gambling programme runs through DICJ and the Social Welfare Bureau.
- Published 2026 self-exclusion or problem-gambling prevalence figures could not be verified in this session.

ADVERTISING

Gambling advertising is heavily restricted and PRC Criminal Law Art. 303 means no concessionaire markets gaming to the mainland.

- Art. 303 (amended 2021) criminalises organising or soliciting mainland residents for cross-border gambling.
- Promotion is confined to non-gaming (concerts, MICE, F&B, hotels), where the 2H26 event calendar is used to pull premium visitation.

COMMERCIAL IMPLICATION

The compliance perimeter is tighter than any Western market a B2B supplier would serve, but compliance technology is a growing procurement line.

- Product must pass DICJ technical certification; payments innovation on the floor is effectively off-limits.
- Any marketing or affiliate activity aimed at Chinese players is a criminal exposure.
- Surveillance, KYC/STR automation, table-management and chip tracking are growing procurement lines for six well-funded buyers.

PAYMENTS, RG & ENFORCEMENT – METRIC / STATUS	STATUS	SOURCE / NOTE
Online gambling	Illegal; no licences	Law 7/2024 strengthened sanctions; DICJ illegal-site list
Illegal currency exchange for gambling	Criminal offence since Oct 2024	Law 7/2024
Gaming credit	Concessionaires only (since Aug 2024)	Gaming-credit law; junkets excluded
Junket commission cap	1.25% of rolling; no revenue share	Law 16/2022
Minimum casino entry age	21	Law 10/2012
Smoking on gaming floors	Banned; enclosed non-gaming lounges only	Since 2019
Advertising of gaming to mainland	Criminal under PRC law (Art. 303, 2021)	Non-gaming promotion only
Gaming-related crime, 9M-26	+12.3% YoY	Macau police via IAG
Visitor arrivals Aug-26	4.5m (record), +6.1%; same-day +11.7%, overnight -2.4%	DSEC via MEA/IAG
Self-exclusion / problem-gambling prevalence 2026	n/a [unverified]	DICJ / SWB

8 HIGHLIGHTS & LOWLIGHTS

▲ HIGHLIGHTS

- Slots are a structural growth line: GGR +18.8% YoY to MOP 4.09bn (~$0.51bn) in Q3-26 and ~+19% for 9M-26 (MOP 12.18bn/~$1.51bn), with share up to 6.8% — the one product the six concessionaires are actively expanding under a 12,000-machine cap, which sustains premium-cabinet replacement demand for EGM suppliers. structural
- Demand volume is at record levels — 4.5m visitors in August (+6.1%), 93.9% hotel occupancy — so the market's problem is yield mix, not footfall; a stabilisation in Chinese high-end sentiment would flow straight to premium-mass GGR. mixed
- Regulatory certainty is unusually high: the 35% + 5% = 40% GGR levy, premiums, inventory caps and six concessions are contractually fixed to 31 Dec 2032, and the profits-tax exemption runs to end-2027; there is no live proposal to raise rates. structural
- The government's FY26 GGR assumption of MOP 236bn (~$29.2bn) needs only MOP 48.9bn (~$6.06bn) in Q4 — a very low bar — and gaming taxes are already +5.9% YoY at MOP 74.56bn (~$9.24bn), removing any fiscal pressure for a tax or premium increase. one-off
- VIP has found a floor: +6.3% QoQ to MOP 16.91bn (~$2.10bn) and +9.9% for 9M-26, now run premium-direct by concessionaires with credit under their own control — a cleaner, higher-margin structure than the junket era. structural
- The non-gaming calendar works: concerts at Galaxy and Venetian arenas visibly lifted premium visitation in early August, and MOP 118.8bn (~$14.7bn) of contractually pledged investment keeps the integrated-resort product improving through 2032. structural
- Six solvent, tax-paying buyers with mandatory DICJ product certification create a concentrated but durable B2B channel for EGMs, ETGs, systems and compliance technology — the only realistic Macau entry for a non-concessionaire. structural

▼ LOWLIGHTS

- Closed market: no new concession before 2033, sub-concessions abolished, satellites wound down, and no online licensing of any kind — there is no B2C route for an outside operator, and the sports-lottery is a single-concession monopoly. structural
- Mass/premium-mass baccarat fell 7.9% YoY and 4.4% QoQ to MOP 33.61bn (~$4.17bn) with GGR per visitor down 7% to MOP 4,888 (~$606); the two-quarter sequential decline signals demand, not variance, and compresses operator EBITDA faster than headline GGR. mixed
- Chinese policy overhang: tax enforcement on offshore trusts/wealth and capital-control tightening are cited by Seaport and CreditSights as drags on high-end demand; four consecutive monthly YoY declines (Jun–Sep) and FY26 growth consensus cut to ~1–3% from 7%. watch
- The world's highest headline casino levy — 40% of GGR plus fixed/variable premiums, a 35%-of-shortfall minimum-yield premium (MOP 7m/~$0.87m per table) and MOP 118.8bn (~$14.7bn) of mandated non-gaming capex — leaves thin margin for error if GGR stays ~15% below 2019. structural
- Enforcement intensity is rising, not falling: gaming-related crime +12.3% in 9M-26, criminalised currency exchange (Law 7/2024), concessionaire-only credit, and PRC criminal exposure for any marketing to mainland players — compliance cost and legal risk are structurally high for any vendor or partner. governance
- Data definitions are unreliable for modelling: DICJ's 'VIP' (28.1% of GGR) is far above the concessionaires' own VIP disclosures, and trade-press 9M totals diverge (MOP 187.1bn vs a mislabelled 181.3bn); operator-level market shares are not published by the regulator. watch
- Regional competition for the same Chinese premium customer is building — UAE (Wynn Al Marjan, 2027), Philippines and Singapore today, Thailand and Japan (Osaka, 2030) later — while Macau's product is 84% baccarat and cannot add online. structural

9 FORECAST & OUTLOOK

Guidance bridge. The official FY26 anchor is the budget's MOP 236bn (~$29.2bn) GGR assumption, reaffirmed by Chief Executive Sam Hou Fai on 10 Oct pending October data; it is a fiscal floor rather than a forecast, since 9M-26 GGR of MOP 187.1bn (~$23.2bn) leaves only MOP 48.9bn (~$6.06bn) to find in Q4 against a Q4-25 base of ~MOP 66.1bn (~$8.19bn). The sell-side has moved the other way: J.P. Morgan now has FY26 at MOP 249bn (~$30.9bn, +1%), Seaport models Q4 −5%, and one bank has October −6% at MOP 22.6bn (~$2.80bn). The swing is entirely in mass/premium-mass baccarat — VIP is flat and slots are adding ~MOP 0.6bn (~$75m) a quarter YoY — and is driven by Chinese high-end demand (macro, offshore-wealth tax enforcement, capital controls) and tough hold comps rather than anything regulatory.

FY25 ACTUAL GGR	9M-26 GGR	Q4-26 ESTIMATE (~5% YOY, OUR BASE CASE)	FY26 ESTIMATE VS GOVERNMENT ASSUMPTION
MOP 247.4bn (~$30.7bn)	**MOP 187.1bn (~$23.2bn)**	**~MOP 62.8bn (~$7.78bn)**	**~MOP 249–250bn (~$30.9–31.0bn), est.**
+9.1% YoY	+3.2% YoY; Q3 −3.8%	vs Q4-25 ~MOP 66.1bn (~$8.19bn)	+1% YoY; govt MOP 236bn (~$29.2bn) will be beaten

Independent view. Market: our base case is FY26 GGR of ~MOP 250bn (~$31.0bn), +1% (estimate), with Q4 down ~5% on tough hold comps and soft premium mass; a flat Q4 would give ~MOP 253bn (~$31.4bn, +2.3%) and −8% would give ~MOP 248bn (~$30.7bn, +0.2%). Comps ease materially from Q2-27 (World Cup base) and the 2027 calendar lacks a comparable sporting drag, so we expect a return to **low-single-digit growth in 2027**, still ~15% below 2019 — with **slots compounding mid-teens** and mass baccarat flat-to-down until Chinese wealth sentiment turns. **Margins:** operator EBITDA falls faster than GGR in 2H26 (CLSA/Goldman), and the 40% levy plus minimum-yield premiums make the government's take almost fully variable-proof; expect gaming tax of ~MOP 99–100bn (~$12.3–12.4bn) for FY26 (estimate, 40% × GGR), well above the MOP 92.53bn (~$11.47bn) budget. **Rules:** no change to the 35%/40% rate, the six concessions or the inventory caps before 2032; the 2027 Policy Address (Nov 2026) will reset the GGR assumption (likely ~MOP 240–250bn/~$29.7–31.0bn, estimate) and may expand the foreign-player levy waiver as a diversification tool; the profits-tax exemption is likely renewed beyond 2027. **Enforcement direction is one-way tighter** — expect further action on illegal exchange, cross-border online gambling and junket residue, and closer DICJ auditing of non-gaming investment delivery. **For B2Tech:** treat Macau as a B2B-only, slot-and-systems opportunity with six buyers, and as the demand bellwether for Chinese premium play across Asia — not as a licensing target.

What to watch next quarter:

- October 2026 DICJ monthly GGR (1 Nov) and the CE's stated decision point on the MOP 236bn (~$29.2bn) forecast; Q4 needs only MOP 16.3bn (~$2.02bn)/month.
- Concessionaire Q3-26 results (late Oct–early Nov): property EBITDA margins, premium-mass commentary, reported VIP vs DICJ's 28.1% share, and any disclosure of operator GGR shares.
- 2027 Policy Address and budget (Nov 2026): new GGR assumption, profits-tax exemption renewal (expires 31 Dec 2027), foreign-player 5% levy waiver, and non-gaming investment compliance.
- PRC policy: offshore-income/trust tax enforcement, capital-control measures, UnionPay/cash rules, and any change in Individual Visit Scheme coverage or visa facilitation.
- DICJ enforcement cadence: illegal currency-exchange prosecutions under Law 7/2024, junket licence renewals for 2027, and the post-satellite casino footprint (tables/slots vs the 6,000/12,000 caps).
- Regional competition milestones: UAE commercial gaming (Wynn Al Marjan, 2027), Thailand entertainment-complex legislation, and Philippine/Singapore premium-mass trends.

DATA CONFIDENCE: MEDIUM FX: USD/MOP ~8.07 as of 30 Sep 2026 (MOP is pegged to HKD at 1.03; rate implied by contemporaneous press conversions of DICJ data, e.g. MOP 60.22bn = US$7.46bn). Confidence MEDIUM: headline Q3-26, Q2-26, Q1-26 and monthly GGR figures are DICJ data relayed identically by four independent trade outlets (IAG, AGB, Focus GN, Yogonet/WCD) and reconcile to within MOP 0.01bn across monthly and quarterly series, but the DICJ statistical tables themselves could not be loaded in this session (fetch quota). Fiscal figures are from the Financial Services Bureau via GGRAsia/IAG; concession/tax rules are from the Wynn Macau HKEX concession announcement, the 2022 contract summaries, Chambers and PwC. Items derived by calculation are labelled 'derived'. Not verified in this session: licensed junket count, table/slot counts and casino count at 30 Sep 2026, satellite-casino closures, operator market shares, the incremental non-gaming investment amount after the MOP 180bn trigger, and 2026 self-exclusion statistics — all marked n/a or [unverified]. One source (Focus GN) reports 9M-26 GGR as MOP 181.3bn/+3.7%; this equals the 9M-25 base and is treated as mislabelled; the MOP 187.1bn/+3.2% figure (IAG, Asia Casino) is used.
